YEN SOKRITHA

FULL-STACK WEB ENGINEER

sokritha.dev@gmail.com | +855-69863170 | St 123, Commune Toul Tumpong I, District Chamkar Mon, Phnom Penh
linkedin.com/in/sokritha-yen

Profile Summary

Full-Stack Developer with 4+ years of experience building and maintaining web applications using TypeScript, Node.js, React, Next.js, databases, and AWS. Experienced in backend development, API integration, database transactions, payment integration, and AI-powered search. Comfortable working across the development lifecycle, from implementing features and investigating issues to deployment and production support.

Technical Skill

- Languages: JavaScript, TypeScript
- Frontend Technologies: React, NextJS, Tailwind CSS, MicroFrontend
- Backend Technologies: NodeJS, Express, GraphQL, MongoDB, MySQL, DynamoDB, Serverless
- Cloud & Infrastructure: AWS, EC2, RDS, S3, Lambda, ALB, CloudWatch, Docker, Nginx
- DevOps: Git, GitHub Actions, CI/CD
- AI & Search: LLM APIs, Embeddings, Multimodal Embeddings, Vector Search
- Payments: Stripe, credit cards, Google Pay, Apple Pay, convenience-store payments, bank transfers

Work Experience

Full Stack Web Engineer - Marinax PP (Cambodia) Co., Ltd. *Oct 2025 - Present*

- **Gacha Platform - Launched February 2026**:
  - Independently developed and maintained the user-facing and admin applications using Next.js, TypeScript, Prisma, and MariaDB, supporting approximately 1,200 registered users and 900K gacha draws.
  - Designed and implemented the core gacha and business-rule system, supporting probability-based, fixed-allocation, and hybrid draw mechanisms with configurable play limits, rank requirements, spending thresholds, and per-draw-type restrictions. Developed supporting inventory, coin exchange, rank, delivery, draw history, and administrative workflows.
  - Integrated Stripe payments supporting credit cards, Google Pay, Apple Pay, convenience-store payments, bank transfers, and refunds.
  - Deployed and operated the production application on AWS EC2, RDS, S3, Application Load Balancer, and CloudWatch, handling typical traffic of ~200–300 req/min and peak traffic of ~1,500 req/min.

- **FranchBed Data Platform - Beta**:
  - Developed an AI-powered multimodal product search system supporting text and image-based queries for a product catalog of approximately 150K products, using embeddings and GCP Vector Search.
  - Designed and implemented the product embedding pipeline, defining which product fields to embed, which fields to store as metadata, and associated filtering/retrieval configurations. Evaluated and migrated the embedding approach from text-embedding-005 to Gemini Embedding 2.
  - Implemented a hybrid search approach combining SQL and vector search, while evaluating retrieval quality using Recall@K, MRR, NDCG, and Hit Rate.
  - Developed application features using Laravel and Blade, including admin management, product homepage/detail pages, and related-product recommendations based on product attributes.

Coach & Full Stack Developer - SabaiCode *June 2022 - Jan 2025*

- Developed the E-Learning Platform using Serverless, GraphQL/AppSync, and AWS, contributing to both beta and production features including video tutorials, class and lesson management, authentication, staff/admin management, scholarship submission and review workflows, and school landing pages.
- Mentored 60 students across four Full-Stack Web Development Bootcamps, covering frontend, backend, databases, Git/GitHub, CI/CD, Docker, and AWS.
- Designed and prepared course materials covering web development fundamentals, project methodology, SDLC, frontend/backend development, cloud infrastructure, and deployment practices.
- Guided student teams through 3–4 projects per bootcamp, providing technical discussions, code/project feedback, debugging support, and preparation for project presentations to sponsorship partners.

Internship, Web Developer at The Cambodia Securities Exchange (3 months) *2021*

- Developed a real-time investor order and information renewal system, integrating with other systems via TCP/UDP using React, WebSocket, Java, Spring Boot, REST, and MySQL.

Internship, Frontend Developer at Optistech Company (3 months) *2020*

- Designed and implemented a new dashboard for managing the ticket system, ensuring seamless integration with the existing backend using Angular and Material UI.

Education

Institute of Technology of Cambodia *2016-2021*
Bachelor Degree of Computer Science

Beltei International School *2017*
Completed ESL Program

Volunteering Activities

Trainer, Institute of Technology of Cambodia (3 months)

- Delivered comprehensive training on basic algorithms and programming in C to junior students. *2019*

Environmental Teacher, Global Peace Organization (3 months)

- Educated third-grade students at Kdey Takoy Primary School about environmental subjects. *2017*

Languages

- Khmer (Native)
- English (Proficient)

Interest

- Web Architecture Design
- Machine Learning / AI
